

# When Can I Log Into Bitbucket (class git repository) and Confluence (class wiki)?

The Atlassian software used by this class is maintained by the systems staff <https://help.sci.uwo.ca/serviceesk/customer/portal/2/user/login?destination=portal%2F2> .

Getting your account set up is an automatic process that works as follows:

- You enroll with the registrars office in the course
- Within seven days, this information is transferred from the registrar's office to our systems staff
- A nightly job updates the system's staff on the enrollment information the registrar's office has made available.
- 24 hours later, that information propagates through the Atlassian system.

So it could take as long as 8 days in the normal scheme of things, before a late registering student can log into the software. With regards to students who registered earlier, there are already 70 students who can login to the system. So the delays discussed above are about students who weren't registered 8 days ago.

When logging in, note that you should be using the department installation of the Atlassian software at [CS 4472 - Fall 2017 Home](#) and not other servers scattered around the net.
