By default you are required to do a project in the second semester quarter.

Check which of the following three options you want to change the default to (check only one option):

_____ Do two projects, one in first semester quarter and one in second semester quarter.

_____ Do one project, but in the first semester quarter.

_____ Do one project in the second semester quarter as per default.

By default you are required to do a project in the fourth semester quarter.

Check which of the following four options you want to change the default to (check only one option):

_____ Do two projects, one in third semester quarter and one in fourth semester quarter.

_____ Do one project, but in the third semester quarter.

_____ Do one project in the fourth semester quarter as per default.

_____ Do no projects in second half of semester.

Note that each project done counts for 6% with a maximum of four projects (at most one per quarter) and a minimum of one project. See course outline for details of how the marking adjusts to the different choices.
