

Undergraduate Theses and Similar Work Supervised

- [119] T. J. Smith: A study of solid hypercodes. Undergraduate Thesis, The University of Western Ontario, 2015.
- [120] H. Ritter: Konzept und Analyse des Modells eines Mehr-Wellen-Solitonautomaten. BSc Thesis, Universität Potsdam, 2013.
- [121] C. Hilprecht: Ludo for the blind – Mensch-ärgere-dich-nicht für Blinde. Bachelorarbeit, Hochschule für Technik und Wirtschaft Berlin, 2011, v + 163 pp.
- [122] P. Babeck: Screen Scraping Technologien: Das Auslesen von Texten aus Windowsanwendungen. Student Research Project, Institut für Informatik, Universität Potsdam, 2011, 36 pp.
- [123] S. Hosp: Skype-Filter für HyperBraille. Research Project, Institut für Informatik, Universität Potsdam, 2010, 23 pp.
- [124] M. Ivanchev: Umwandlung von *drawingml*-Diagrammen in das Vektorgrafikformat SVG. Student Research Project, Institut für Informatik, Universität Potsdam, 2010, 22 pp.
- [125] I. Sturm: Gestures on the BrailleDis9000 – User Test 1. Student Research Project ‘Assisted Living – Informationszugang für Blinde’, Institut für Informatik, Universität Potsdam, 2009, 38 pp.
- [126] H. Pannhorst: Auslesen von Bildern über das Word Objekt-Modell. Student Research Project, Institut für Informatik, Universität Potsdam, 2008, 10 pp.
- [127] M. Ivanchev: Einführung zu RibbonX mit Bezug zu Microsoft Word 2007. Student Research Project, Institut für Informatik, Universität Potsdam, 2008, 25 pp.
- [128] K. Eckstein: Administration und Programmierung von Umfragen. Praktikumsbericht, Institut für Informatik, Universität Potsdam, 2008, 25 pp. In co-operation with “trommsdorff + drüner, innovation + marketing consultants GmbH”, Berlin.

- [129] I. Sturm: Entwurf eines gestischen Bedienkonzepts für ein taktiles Eingabegerät im Rahmen des Projektes Hyperbraille. Student Research Project, Institut für Informatik, Universität Potsdam, 2008, 36 pp.
- [130] S. Richter: Kleiner Einblick in die Thematik "Grafik für Blinde". Studienarbeit, Institut für Informatik, Universität Potsdam, 2008.
- [131] I. Sturm: Interaktion durch Gesten in HyperBraille. Studienarbeit, Institut für Informatik, Universität Potsdam, 2007, 16 pp.
- [132] S. Richter: Kritik der Arbeit "the significance of letter position in word recognition" von Graham Ernest Rawlinson. Belegarbeit, Institut für Informatik, Universität Potsdam, 2007, [1] + 25 + [1] pp.
- [133] N. Abdulsaid: T_EX to Braille translation. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, [2005], [1] + 43 pp.
- [134] S. Eisler: Spezifikation und Test von Protokollen. Vergleichende Spezifikation eines Tempomat mit Hilfe verschiedener Spezifikationssprachen. Studienarbeit, Institut für Informatik, Universität Potsdam, 2005, 55 pp.
- [135] A. C. Ulusoy: Design and implementation of a speaker recognition system. Projektbericht (Staj Defteri), Universität Potsdam, Istanbul Teknik Üniversitesi, Elektrik-Elektronik Fakültesi, 2005.
- [136] F. Biegler: Usage of rewriting systems to model city development. Studienarbeit, Institut für Informatik, Universität Potsdam, 2004, 44 pp.
- [137] C. Herrmann: Quantum-Information. Studienarbeit, Institut für Informatik, Universität Potsdam, 2004.
- [138] Y. Zhang: Simulation of ants' communication using automata. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 2003, 28 pp.
- [139] J. Höhle: Bewegtbildkompression unter Verwendung von wavelets. Studienarbeit, Institut für Informatik, Universität Potsdam, 2003.

- [140] C. Haustein: Anpassung des Plain-TeX-Formats für taktile Displays. Studienarbeit, Institut für Informatik, Universität Potsdam, 2002, 1 + iv + 38 pp.
- [141] J. Yao: Suchdienste im Internet. Studienarbeit, Institut für Informatik, Universität Potsdam, 2002.
- [142] Z. Li: Construct DNA code words using backtrack algorithm. Research report, Department of Computer Science, The University of Western Ontario, 2002.
- [143] A. Lüdemann: Dynamisch erweiterbarer Übersetzer zur Print- und Sprachausgabe von VHDL-Dokumenten (konzeptioneller Entwurf). Studienarbeit, Institut für Informatik, Universität Potsdam, 2002.
- [144] D. Brust: Simulation gentechnischer Experimente zum DNA-Computing. Studienarbeit, Institut für Informatik, Universität Potsdam, 2001.
- [145] C. Power: The implementation of talking diagrams for the visually impaired. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 2000, iv + 25 pp. Published as Report 218, Department of Computer Science, The University of Western Ontario.
- [146] L.-A. Ridley: Survey of international encryption policies. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 2000.
- [147] B. Dubroy: An investigation of network control security. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 2000.
- [148] M. Hoeberechts: Molecular computation: Soliton valves and other proposals. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1999, 46 pp.
- [149] B. Devereux: A model for intersymbol interference errors in optical pulse position modulation due to fibre nonlinearities. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1999, 26 pp.

- [150] M. Eramian: Displaying DVI files in Braille: A viewer for the visually impaired. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1997, 44 pp. Published as Report 500, Department of Computer Science, The University of Western Ontario.
- [151] C. Miller: Multimedia statistical diagrams. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1996, 43 + [17] pp.
- [152] I. Gyacskov: Displaying trees on the DMD. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1995, [1] + 89 pp.
- [153] K. Dunne: Multimedia representation of binary tree diagrams. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1995.
- [154] N. Cairns: Statistical graphs for the visually impaired. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1995.
- [155] M. Eramian: DVI2DOT Version 0.5a, Braille translation package for the Braille tactile display, user's manual. Research Report, Department of Computer Science, The University of Western Ontario, 1995.
- [156] T. F. Alves: Talking trees. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1994.
- [157] J. H. G. Redekop: BrailleView: Design report '93. Research report, Department of Computer Science, The University of Western Ontario, 1993, [1] + ii + 26 pp. Based on the 1991 BrailleView Design Report ; contains the source code as an appendix.
- [158] J. H. G. Redekop: BrailleSens: Report '93. Research report, Department of Computer Science, The University of Western Ontario, 1993, [1] + ii + 18 pp. Contains the source code as appendix.
- [159] J. McGrenere: A parallel solution to backtracking problems. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1993.

- [160] W. Pitman: Public key cryptographic systems based on word problems. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1992. Co-supervisor: L. E. Robbins.
- [161] C. Haselmayer, T. Bogue: BrailleView design report. Research report, Department of Computer Science, The University of Western Ontario, 1991.
- [162] K. H. Kwok: Low-resolution display of binary and unary-binary trees. Undergraduate Thesis, The University of Western Ontario, 1991, ii + 57 + 25 pp.
- [163] S. Foreth, E. Kowgier: Low-resolution display of the simple switching circuit diagrams. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1990.
- [164] P. Wong: Fault testing and diagnosis. Research report, Department of Computer Science, The University of Western Ontario, 1990.
- [165] P. Wong: An analytical approach to fault testing and fault coverage. Research report, Department of Computer Science, The University of Western Ontario, 1990.
- [166] K.-L. Lam: DVI-ReGIS driver and integrated graphics on T_EX. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1988.
- [167] R. Arrabito: Using T_EX to produce Braille mathematical notation in accordance with the Nemeth Braille code for mathematics and science notation, 1972 revision. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1987.
- [168] W. Tsz-fung: Preview of T_EX on SUN. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1987, iv + 68 + 102 pp.
- [169] P. Wong: An automatic system for breaking polyalphabetic substitution ciphers. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1987, Approximately 120 pp.

- [170] S. Dunne: Foundations for a general mark-setting system with applications to musical score formatting. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1987, iv + 206 pp.
- [171] H.-Y. Wong: Chinese character generator. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1987.
- [172] E. Rowe: Driver generator for TEX on a family of line printers. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1986.
- [173] W. Lau: Compare and evaluate the output from various cryptographic schemes using statistical randomness tests. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, [1986].
- [174] D. Landers: The design & implementation of ELISP, a meta-language preprocessor for LISP. Undergraduate Thesis, Department of Computer Science, The University of Western Ontario, 1985.
- [175] U. Gräf: Statistische Messungen an dem Kryptosystem von Rivest, Shamir und Adleman. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1983.
- [176] T. Milbredt: Datenverschlüsselung. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1983.
- [177] M. Schroepel: Datenverschlüsselung. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1983.
- [178] B. Burgraf, R. Hück: Die Programmierung der klassischen Verfahren. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1981, 45 pp. plus program listings.
- [179] G. Hascher, D. Schäffler: Entwicklung eines Programmsystems für Verwaltungsarbeiten in der zahnärztlichen Praxis und Implementierung auf dem Minicomputersystem COMPUCORP 675. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1981.

- [180] M. Jäger: Komplexitätsklassen und homomorphe Replikation. Forschungsbericht, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1980.
- [181] P. Kirchenmayer: Array-automaten. Studienarbeit, Institut für theoretische Informatik, Technische Hochschule Darmstadt, 1979.
