

Newport Forest

March 26 2002

3:30 - ?? pm

Note: this report reconstructed from field notes seven years after the fact

Weather: overcast, light snow; NW; LM 0° C; FCF 0° C

Purpose: quick visit

Participants: Kee + ?

I filled the tray feeder by the trailer and the one on the walnut by HBF. I also filled the suet feeder in the Nook. There is nearly 2 cm of snow cover in the LM.

Checking the deer feeders: the BCF feeder was nearly empty, while the one on the bluffs was still nearly full. I found tracks of an Eastern Cottontail in the LM headed towards ET.
