

**Newport Forest** Sunday April 23 2006

2:15 - 6:35 pm

**Weather:** prec. 9mm; 615; cld/sn; WSW 20kmh; LM 16C; FCF 16C

**Purpose:** planting trees

**Participants:** Kee, Brian, Latif

I planted approx 20 Pignut Hickories in the TS, while Brian and Latif planted 25 Bur Oaks in the LM core zones. I also planted 3 more PPs, this time along the N bank of FC, each young tree placed “downstream” of a much larger tree for protection during floods.

I found a wood tick at the TS, sitting on one of my jugs. The tank has a leaky valve and we are losing about 500 gal/week.

**Phenology:** first wood tick
