1) Based on the example Cucumber code from RailsCasts #155, using the line numbers provided on the printout, indicate on this page where you would make changes to support the addition of a third field called Ratings to this example (node: Spuds is rated PG-13).

2) What is meant by ‘traceability’ in the Ziv talk?
3) What sort of testing is the focus of ‘Analysis of Software Test Generation --- Comparision Between High Skilled and Low Skilled Engineers’?
