

THE UNIVERSITY OF WESTERN ONTARIO

DEPARTMENT OF COMPUTER SCIENCE
LONDON CANADA

Computer Science 3340b Analysis of Algorithms Course Outline – January 2022

Course Information

Computer Science 3340b
Analysis of Algorithms
Course Outline – Winter Term 2022

Prerequisites

Computer Science 2210, 2211, Computer Science 2214 or Mathematics 2155.

Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you will be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

Instructor

Dr. Kaizhong Zhang
372 Middlesex College
Tel: 661-3826, ext. 83826
Course Email: cs3340b<at>uwo.ca
Office Hours: Zoom: by appointment only (arranged at least one day prior)

Course Description

Algorithms are precisely stated, general problem solving methods suitable for computer implementation. Data Structures are methods of organizing data involved in computation.

Algorithms and data structures are central objects of study in computer science. Once appropriate algorithms and data structures are chosen, all that remains in most computer programs is routine coding. Moreover, algorithms and data structures go hand in hand: neither can be studied fruitfully without knowledge of the other.

The course studies techniques for designing and analyzing algorithms and data structures. The course concentrates on the logical process that leads to the creation of the algorithm, rather than the algorithm itself, and the techniques for evaluating the performance of algorithms. The central idea is that Computer Science is more than just recipes; it is about computational thinking.

Topics

The topics are drawn from the following lists:

- algorithm design basics: algorithm design with mathematical induction, asymptotic notation, and solving recurrence relations.
- algorithm design techniques: divide and conquer, dynamic programming, greedy algorithms, and backtracking.
- searching, sorting, and union-find.
- trees and red-black trees.
- string matching, sequence comparison, and Huffman codes.
- graph algorithms.
- NP-completeness.

Class Schedule

- Tuesday 2:30pm – 3:30pm (EDT/EST London Ontario), MC 110
- Thursday 2:30pm – 4:30pm (EDT/EST London Ontario), MC 110
- Note: Although this course is originally intended to be in-person. Due to Covid-19, from January 10 to January 31, it will be delivered “asynchronously” online. From February 1, its delivery mode will be determined by the Covid-19 landscape at the time.
- January 10 – January 31: Drop in/Office hours
 - Drop in: Tuesday 2:30-3:30pm, no sign-up needed
 - * Answer questions and/or present examples of the notes and videos from the previous week
 - * Answer questions from assignments
 - Office hours: Thursday 2:30-4:30pm, sign-up required
 - * Answer individual questions that will not be beneficial for other students
- Key seasonal dates
 - Classes begin: January 10
 - Reading week: February 19-27
 - Classes end: April 8

Scheduled Lectures

Lectures of this course is asynchronous online and/or in-person. Lecture notes (and videos when asynchronous online) will be available on the course website. These will be made available at the beginning of each week for the duration of the semester.

Teaching Assistant Consulting:

Consulting will take place online through Zoom. Questions regarding assignments or lecture materials can be directed to a Teaching Assistant (TA) or through the Assignment Discussions in the OWL Forums section on OWL. Questions requiring further information can be dealt with by contacting the course instructor through his office hour appointments or send to the course email. A list of teaching assistants and their contact information will be posted to OWL once available.

Technical Requirements

Completion of this course will require you to have a reliable internet connection and a computer with working microphone and webcam that meets the system requirements for Zoom.

Required Textbook

T.H. Cormen, C.E. Leiserson, R.L. Rivest, and C. Stein, *Introduction to Algorithms* (third edition), The MIT Press and McGraw-Hill Book Company, 2009.

Suggested Textbook

M.T. Goodrich and R. Tamassia, *Algorithm Design and Application*, John Wiley & Son, Inc., 2014.

Course Website

The CS3340b website is accessible through OWL: <http://owl.uwo.ca/portal>. Lecture notes (and videos when asynchronous online), assignments, and class information will be posted on this website. You are responsible for reading this information frequently.

Lecture Notes

Course notes (and videos when asynchronous online) will be available online through the course web page. Students are cautioned, however, that getting course notes may not be a sufficient substitute for textbook and/or attending classes.

Computing Facilities

Each student will be given an account on the Computer Science Department senior undergraduate computing facility, GAUL. In accepting the GAUL account, a student agrees to abide by the department's Rules of Ethical Conduct.

Email Contact

Emails related to the course should be directed to the course email account at cs3340b@uwo.ca which will be attended by the designated TAs and the instructor. Students could ask questions via email, however if there are any large, somewhat complicated issues, it is recommended to discuss them during office hours. Moreover, you must use your UWO account in order to write to the course email account.

Online Conduct

All of the remote learning sessions for this course may be recorded. The data captured during these recordings may include your image, voice recordings, chat logs and personal identifiers (name displayed on the screen). The recordings will be used for educational purposes related to this course, including evaluations. The recordings may be disclosed to other individuals participating in the course for their private or group study purposes. Please contact the instructor if you have any concerns related to session recordings.

All Zoom contact will require that your video is turned on and that you can be seen by the instructor. Not only is this a simple courtesy and the standard of Zoom classes, but it allows for a positive interaction. Any student who is in attendance of a Zoom contact and does not have their video active may be removed from the session.

All Zoom contact will require that your audio is turned off and that you cannot be heard by the instructor (unless you are interacting directly with the professor during the Zoom contact). Not only is this a simple courtesy and the standard of Zoom classes, but it allows for a positive interaction. Any student who is in attendance of a Zoom contact and does not have their audio active will be first muted by the professor and if this persists will be removed from the session.

Participants in this course are not permitted to record the sessions, except where recording is an approved accommodation, or the participant has the prior written permission of the instructor.

Student Evaluation

There are two components that will be used for the evaluation.

- Assignments, worth 25%
- Exams, worth 75%

To obtain a passing mark in the course, the weighted average of the Midterm and Final exam marks must be at least 40%, and weighted average on the assignment marks must be at least 40%.

Examinations

When deemed necessary, tests and examinations in this course will be conducted using a remote proctoring service. By taking this course, you are consenting to the use of this software and acknowledging that you will be required to provide personal information (including some biometric data) and that the session will be recorded.

There will be a Midterm exam and a Final exam. Midterm weights **31%** and final weights about **44%**.

The Midterm exam will be (**tentative**) on Thursday March 10 at 2:30-4:20PM. The Final exam will be in April (date and time: TBA).

- There will be no makeup Midterm exam. If you miss the Midterm Exam for any reason, follow the procedure for Academic Considerations given in [this website](#). If accommodation is approved by your Dean's office, your Final Exam mark will be reweighed to include the weight of the Midterm Exam. You must notify the course instructor within a week of the missed Midterm exam, and documentation must be received by your Dean's office within 2 weeks of the missed exam.
- Every effort will be made to have midterm exam marked within two weeks of the exam date, preferably sooner.

Assignments

There will be three assignments in this course. Assignments will be graded by their correctness, preciseness, clarity, and efficiency. In addition, programming questions are also evaluated by coding styles, comments, etc.

All assignment are individual assignments. Students may discuss approaches to assignment problems. However, actual work (answering assignment questions, coding assignment questions, etc.) must be the student's individual effort.

The assignments have to be typed. **We do not accept handwritten assignment.** However, you can include handwritten figures, but not text and formula, in your assignment.

One can use Microsoft Word, LaTeX, and possibly Vim and then convert to pdf format. By far, the best language for scientific writing is LaTeX. While LaTeX is not required, it is a useful and very-easy-to-learn tool. It is freely available for all platforms. A very short and useful introduction to LaTeX can be found [in this document](#). A not so short, more complete, introduction to LaTeX can be found [in this document](#). While unbeatable for all your academic writings, it is a bonus for your CV as well!

Programming parts of the assignments have to be able to run on compute.gaul.csd.uwo.ca. This is the only platform we will test your programs.

Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence.

The standard departmental penalty for assignments that are judged to be the result of academic dishonesty is described [in this website](#).

You are also responsible for reading and respecting the Computer Science Department's policy on [Scholastic Offences](#) and Rules of [Ethical Conduct](#).

The approximate assignment (**tentative**) due dates, and mark distribution are given below:

- Assignment 1 – Tuesday, February 1, **8%**
- Assignment 2 – Tuesday, March 1, **8%**
- Assignment 3 – Tuesday, April 5, **9%**

Assignment Submission Policies

All assignments are submitted electronically through owl course website. Instructions for the submission of assignments will be posted on the course website. It is each student's responsibility to read and follow the instructions.

All assignments are due by 11:55PM of the due date. Late assignments will be accepted for up to three days after the due date. After that the late work is no longer accepted regardless if the OWL assignment submission is open or not. The late penalty in percentage of the total mark of the assignment is 5% for one day late, 25% for two days late and 45% for three days late. Lateness is based on the time the assignment is **received through OWL**, not on the time it was created on student's own computer or his/her gaul account.

If you have submitted a self-reported absence or an academic consideration for an assignment, we acknowledge the university policy and the arrangement of the course is that you must provide documentation in the **CS3340 Assignment Academic Consideration Form** when you submit your assignment for penalty reduction. You do not need to contact the instructor and we will not reply any such inquiry.

The documentation will either be in the form of the approved self-reporting document or the document or email from student services allowing the extension. The teaching assistant grading the assignment will then apply the supplied extension to the grade.

The two days allotted by a Self-reported absence is based on the original assignment due date. The two days requested must be within the three late days. **Self-reported absence cannot be used to further extend the three late days of an assignment.**

Programming parts of the assignments must be able to run on Computer Science Department senior undergraduate computing facility, GAUL, In particular, programming parts of the assignments must be able to run on compute.gaul.csd.uwo.ca.

By submitting an assignment, you declare that:

- You have read and understood the Departmental policies on Scholastic Offences.
- The assignment is exclusively your own work
- You have complied with the Departmental Rules of Ethical Conduct.

- You have taken all reasonable precautions to ensure that your work has not been copied by other students, including the protection of your files from access by other students.

Assignment Marking

Assignments will be marked by the Teaching Assistants who follow marking schemes provided by the instructor.

Every effort will be made to have assignments marked within two weeks of the submission date, preferably sooner.

You should direct any questions regarding assignment marks or marking in the first instance to your TA. If you and the TA. cannot agree, then the TA. will discuss the situation with the instructor.

Such request for an adjustment of an assignment mark must be made within 2 weeks from the day in which it was first available to students. **After 2 weeks, all assignment marks are considered to be final.**

Requests for mark adjustments will only be considered when they are for adjustments of **5 marks or greater.**

Course delivery and assessment with respect to the COVID-19 pandemic

Although the intent is for this course to be delivered in-person to the extent possible, the changing COVID-19 landscape may necessitate some or all of the course to be delivered online, either synchronously (i.e., at the times indicated in the timetable) or asynchronously (e.g., posted on OWL for students to view at their convenience), as deemed most appropriate by the instructor. The grading scheme will not change. Any assessments affected will be conducted online as determined by the course instructor.

When deemed necessary, tests and examinations in this course will be conducted using a remote proctoring service. By taking this course, you are consenting to the use of this software and acknowledging that you will be required to provide personal information (including some biometric data) and that the session will be recorded. Completion of this course will require you to have a reliable internet connection and a device that meets the technical requirements for this service. More information about this remote proctoring service, including technical requirements, is available on Western's Remote Proctoring website at: <https://remoteproctoring.uwo.ca>.

Student Absences

Academic Consideration for Student Absences

Students who experience an extenuating circumstance (illness, injury or other extenuating circumstance) sufficiently significant to temporarily render them unable to meet academic requirements may submit a request for academic consideration through the following routes:

- (i) Submitting a Self-Reported Absence (SRA) form provided that the conditions for submission are met. To be eligible for a Self-Reported Absence:

- an absence must be no more than 48 hours
 - the assessments must be worth no more than 30% of the student’s final grade
 - no more than two SRAs may be submitted during the Fall/Winter term
- (ii) For medical absences, submitting a Student Medical Certificate (SMC) signed by a licensed medical or mental health practitioner to the Academic Counselling office of their Faculty of Registration.
- (iii) Submitting appropriate documentation for non-medical absences to the Academic Counselling office in their Faculty of Registration.

Note that in all cases, students are required to contact their instructors within 24 hours of the end of the period covered, unless otherwise instructed in the course outline.

Students should also note that individual instructors are not permitted to receive documentation directly from a student, whether in support of an application for consideration on medical grounds, or for other reasons. **All documentation required for absences that are not covered by the Self-Reported Absence Policy must be submitted to the Academic Counselling office of a student’s Home Faculty.**

For the policy on Academic Consideration for Student Absences – Undergraduate Students in First Entry Programs, see [this document](#) and for the Student Medical Certificate (SMC), see [this document](#).

Religious Accommodation

When a course requirement conflicts with a religious holiday that requires an absence from the University or prohibits certain activities, students should request accommodation for their absence in writing at least two weeks prior to the holiday to the course instructor and/or the Academic Counselling office of their Faculty of Registration. Please consult University’s list of recognized religious holidays (updated annually) at [Western Multicultural Calendar](#).

Absences from Final Examinations

If you miss the Final Exam, please contact the Academic Counselling office of your Faculty of Registration as soon as you are able to do so. They will assess your eligibility to write the Special Examination (the name given by the University to a makeup Final Exam).

You may also be eligible to write the Special Exam if you are in a “Multiple Exam Situation” (e.g., more than 2 exams in 23-hour period, more than 3 exams in a 47-hour period).

Accommodation and Accessibility

Accommodation Policies

Students with disabilities work with Accessible Education (formerly SSD) which provides recommendations for accommodation based on medical documentation or psychological and cognitive testing. The Academic Accommodation for Students with Disabilities policy can be found at [this website](#).

Academic Policies

The website for Registrarial Services is <http://www.registrar.uwo.ca>.

In accordance with policy, see [this website](#), the centrally administered e-mail account provided to students will be considered the individual's official university e-mail address. It is the responsibility of the account holder to ensure that e-mail received from the University at his/her official university address is attended to in a timely manner.

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following web site: see [this website](#).

Computer-marked multiple-choice tests and exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.

All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (<http://www.turnitin.com>).

Completion of this course will require you to have a reliable internet connection and a device that meets the system requirements for Zoom. Information about the system requirements are available at the following link: <https://support.zoom.us/hc/en-us>.

Tests and examinations in this course may be conducted using a remote proctoring service. By taking this course, you are consenting to the use of this software and acknowledge that you will be required to provide personal information (including some biometric data) and the session will be recorded. Completion of this course will require you to have a reliable internet connection and a device that meets the technical requirements for this service. More information about this remote proctoring service, including technical requirements, is available on Western's Remote Proctoring website at: <https://remoteproctoring.uwo.ca>.

Support Services

Please visit the Science & Basic Medical Sciences Academic Counselling webpage for information on add/drop courses, academic considerations for absences, appeals, exam conflicts, and many other academic related matters: <https://www.uwo.ca/sci/counselling/>.

Please contact the course instructor if you require lecture or printed material in an alternate format or if any other arrangements can make this course more accessible to you. You may also wish to contact Student Accessibility Services (SAS) at (519) 661-2147 if you have any questions regarding accommodations.

Western University is committed to a thriving campus as we deliver our courses in the mixed model of both virtual and face-to-face formats. We encourage you to check out the [Digital Student Experience](#) website to manage your academics and well-being.

Students who are in emotional/mental distress should refer to Mental Health@Western ([at this website](#)) for a complete list of options about how to obtain help.

Additional student-run support services are offered by the USC, see [this website](#).
