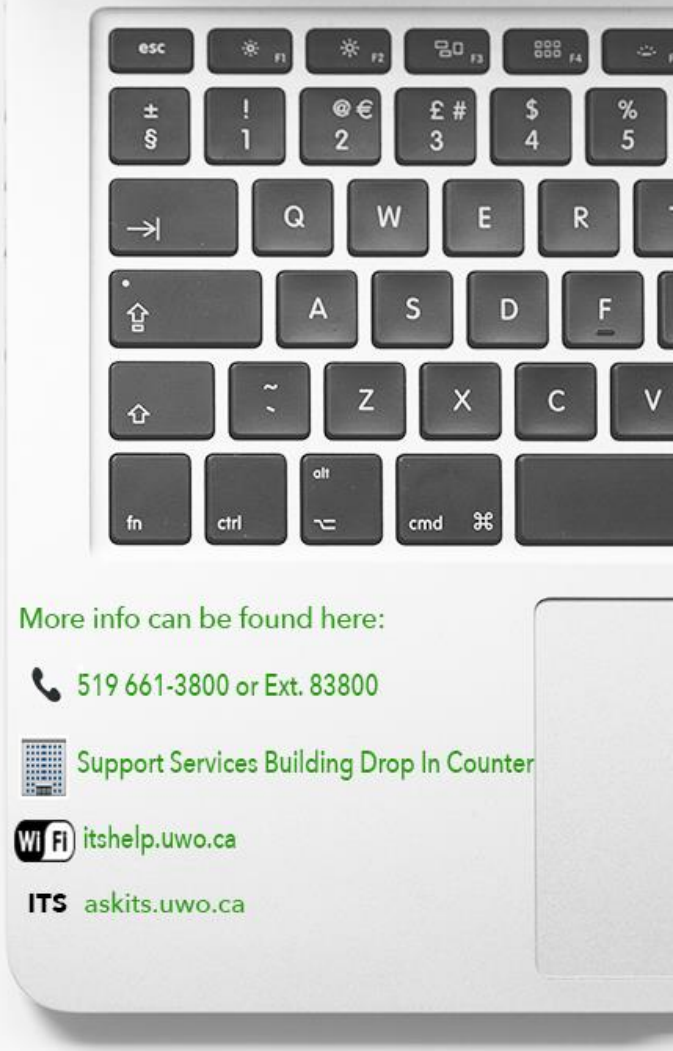
Change passwords often, keep them challenging
Don't fall for suspicious pop ups
Use antivirus software

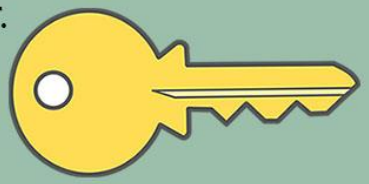


October is National Cyber Security Awareness Month!

https://cybersmart.uwo.ca

Sharing your password is like giving your housekeys to a stranger.

NOT a good idea.



know how to **Protect yourself**

- NEVER share your personal passwords.
- DON'T download or share links without confirming the sender.
- be CAREFUL with entering personal information on a public computer.

October is national cyber security awareness month-

learn to **Protect Western**

- Protecting yourself IS protecting Western!
- Report phishing emails to Western ITS services.
- Spread awareness on the importance of internet safety!

October is National Cyber Security Awareness Month in North America

3 Ways You Can Protect Yourself And Be Cybersmart:

- Know who you are talking to online before you meet them in person! People may not be who they really are online
- Don't keep the same password for everything! If someone finds out one password, they will know the rest!
- Do not accept anyone you do not know on Facebook. It might just be a fake account to stalk your everyday life.

3 Ways You Can Protect Western's Cyber Security:

- perform frequent virus checks, if you connect to Western's internet wth a virus, we might get it too!
- Beware of phishing emails. Open links only from people you know. If you get phished, your email will now be used to phish other UWO emails.
- If you find a lost device, bring it to Campus Police. You are helping the community that way!

Be *Cybersmart*.
Avoid being phished.

October is **National Cyber Security Awareness Month:**

What can you do to #ProtectU?

Protect yourself:

1. Be skeptical - if an email offer seems too good to be true, it probably is

2. Be vigilant - do not give out private information over the phone or over email

3. Set secure passwords - avoid using your name and them update regularly

Protect Western:

1. Protect yourself to protect your school - if your device gets a virus, it could spread if you are connected to the Western network

2. Be swift - if you lose your device, change all of your passwords ASAP

3. Avoid using your UWO email for non-academic purposes - do not give hackers the chance to penetrate the UWO system
